Biographical Data of Corporate Officers

Severinus Petrus Paulus Hermans (President and CEO)

Qualifications: Rien graduated from University of Amsterdam with a degree of Master of Science in Business Economics in 1990, and took his post graduate degree from Tilburg Institute of Advanced Studies with Master of Marketing in 1997.

Relevant Experience: Over the past 30 years Rien has worked in the financial service industry, in marketing, strategy and in several executive and board member positions. A significant part of his career was spent in The Philippines, where he initially headed ING's insurance business and in a later stage returned to lead AXA on its journey to become one of the top 3 insurance companies in the country.

His career started with ING Netherlands after earning his Master's degree in business at the University of Amsterdam. His first assignment was to design, launch and manage life insurance products for the 7 million clients of ING's direct marketing bank; Postbank. By creating transparent and understandable product propositions, administered in a cost-effective manner, the bank's venture became a success both by increasing customer share of wallet as well as by improving the bank's financials.

After initiating a strategic review to accelerate ING's retail insurance business, he was invited by the Executive Board to join the Strategy & Planning department, where he was soon promoted to Vice President. Beside strategic reviews of several business units he headed some of the Group's strategic initiatives including ING Direct's Euro strategy.

To strengthen his management experience, Rien was assigned to head ING Philippines as President & CEO when he was 33 years old. Building a business, leading a team, managing change especially after the Aetna acquisition and working in the Philippines fitted him like a glove.

It is therefore understandable that when he was invited to lead AXA Philippines, after successfully heading ING's retail business in Malaysia and subsequently Poland, he took his chance and accepted the challenge to turnaround the distressed business.

By setting a clear strategy revolving around delivering customer value, building a strong management team and executing the agreed roadmap fiercely, AXA was able to double assets under management, triple premium income, quadruple sales, and quintuple its appraisal value during his 7 years of leadership.

In every business Rien has been able to gain market share, by improving sales effectiveness, developing new distribution channels or starting new partnerships. As the first in the Philippines, he implemented salesforce automation, advisor selection for clients on the internet, a mobile app to empower policyholders and he ensured to be the first to launch direct life insurance products, protection and savings products that can be purchased without any staff interaction.

At least as important however is that he has done all this while improving the key metric of the business; customer satisfaction.
